Code

Installing Datadog:

```
DD_API_KEY= bash -c "$(curl -L https://raw.githubusercontent.com/DataDog/datadog-agent/master/cmd/agent/install_script.sh)"
```

Check status:

```
sudo datadog-agent status
```

correct output

```
Getting the status from the agent. ===== Agent (v6.2.0)
===== Status date: 2018-05-16 19:45:31.773123 UTC Pid: 26471 Python Version:
2.7.12 Logs: Check Runners: 1 Log Level: info Paths ===== Config File: /etc/datadog-
agent/datadog.yaml conf.d: /etc/datadog-agent/conf.d checks.d: /etc/datadog-
agent/checks.d [...]
